## Homework #6 (10pts total)

- 1. Why is it wrong to claim that the Copernican system was simpler than the Ptolemaic system?
- 2. What is the significance of Galileo's observations of the phases of Venus?
- 3. What is uniform motion according to Galileo? What does the thought experiment of dropping objects from the masts of moving ships and ships at rest supposed to demonstrate?
- 4. According to Kearney, what two Copernican assumptions did Kepler modify?
